OBJECTIVE

Aspiring Engineering graduate from Brindavan College of Engineering (VTU) with expertise in programming, web development, machine learning, and computer vision. Skilled in Python, C/C++, SQL, and modern development tools, seeking an entry-level AI/ML or Full Stack Developer role to contribute to intelligent and scalable real-world solutions.

EDUCATION

Bachelor of Technology in Computer Science

Brindavan College of Engineering, Bengaluru

CGPA: 8.34

11th & 12th Grade – Department of Pre-University

Brilliant P U College, Karnataka

Percentage: 86.4%

10th Grade – Board of Secondary Education

Chirantana High School, Karnataka

Percentage: 83.36%

SKILLS

Programming Languages: Python, C++, SQL, JavaScript

Core Concepts: Data Structures, Algorithms, OOP

Machine Learning & AI: Model Training, Classification, Regression, Computer Vision, NLP, Explainable AI (XAI), Multimodal Learning

Deep Learning Models: ANN, CNN, LSTM, VGG, ResNet, Vision Transformer (ViT), YOLOv8, Grad-CAM

Libraries/Frameworks: NumPy, Pandas, Matplotlib, Seaborn, OpenCV, PyTorch

Databases: MongoDB, MySQL, PostgreSQL

Tools: Git, GitHub, Jupyter Notebook, Google Colab

Operating Systems: Windows, Linux

APPRENTICESHIPS

Machine Learning Trainee under SAP

Edunet Foundation, Karnataka

Sep 2025 – Feb 2026

- Trained in ML algorithms including Linear Regression, Logistic Regression, SVM, Decision Trees, Random Forest, and KNN.
- Learned deep learning concepts including ANN, CNN architectures, LSTM networks, VGG models, and model training workflows.
- Worked on NLP tasks, data preprocessing, visualization, and ML pipeline development using Python.

PROJECTS

CheatShield AI – Smart Exam Surveillance System

Jan 2026 – Mar 2026

- Developing AI-powered examination monitoring system using computer vision and deep learning.
- Utilizes face recognition, YOLOv8 phone detection, and behavior analysis to identify malpractice.
- Generates automated alerts, attendance records, and examination monitoring reports.

Scholar – Explainable AI Platform for Alzheimer's Detection

Mar 2026 – April 2026

- Developed a multimodal AI system for Alzheimer's disease detection using brain MRI scans and clinical data.
- Implemented 3D U-Net segmentation, ResNet feature extraction, Vision Transformer models, and Grad-CAM explainability.
- Built an autonomous research agent that validates AI predictions using scientific literature from PubMed, Semantic Scholar, and arXiv.

Crisis Connector – Emergency Service Web Application

July 2025 – Nov 2025

- Developed a MERN-stack emergency response platform with real-time mapping and geospatial services.
- Integrated hospitals, police stations, fire brigades, and emergency services with secure authentication.

COMPETITIONS AND AWARDS

IDEATHON-2K24 – Team Lead (Runner Up)

Dec 2024

BRIN-HACK 2025 – National Level Hackathon

May 2025

0-1 Hackathon E-summit'25 – IIIT Delhi

Aug 2025

LUMINUS – National Level Hackathon

Apr 2026
